## Product Sheet

# CUT OUTS

Cut outs can be made in all floor panels for the installation of accessories.

*PBS accepts no liability whatsoever for any direct or indirect damages, of any nature whatsoever arising from the information on this product sheet.*

### Accessories Cut Outs

PBS can make almost any cut-outs in a panel in their factory. You just need to give us the specifications and our CNC controlled machines will make the correct cut-out. Position and shape are fully adjustable. If the numbers and exact shape are not yet known the cut-outs can also be done by manually on the job. As a cut-out weakens a panel we can attach a steel plate underneath in order to reinforce the panel.
